Options

[Hardware and Software Requirements](#)

View the hardware and software requirements.

[Security Documentation](#)

View the security documentation.

[Online Release Notes](#)

View the latest information about the release.

[Setup Documentation](#)

Read the Overview of SQL Server Setup Documentation topic for information about SQL Server Books Online. The Setup documentation includes an overview of SQL Server installation, the help topics that are needed during installation, and links to more detailed information about planning, installing, and configuring SQL Server.

[System Configuration Checker](#)

Launch a tool to check for conditions that prevent a successful SQL Server installation.

[Install Upgrade Advisor](#)

Upgrade Advisor analyzes any SQL Server 2005 or SQL Server 2000 components that are installed and identifies issues to fix either before or after you upgrade to SQL Server 2008 R2.

[Online Installation Help](#)

Launch the online installation documentation.

[How to Get Started with SQL Server 2008 R2 Failover Clustering](#)

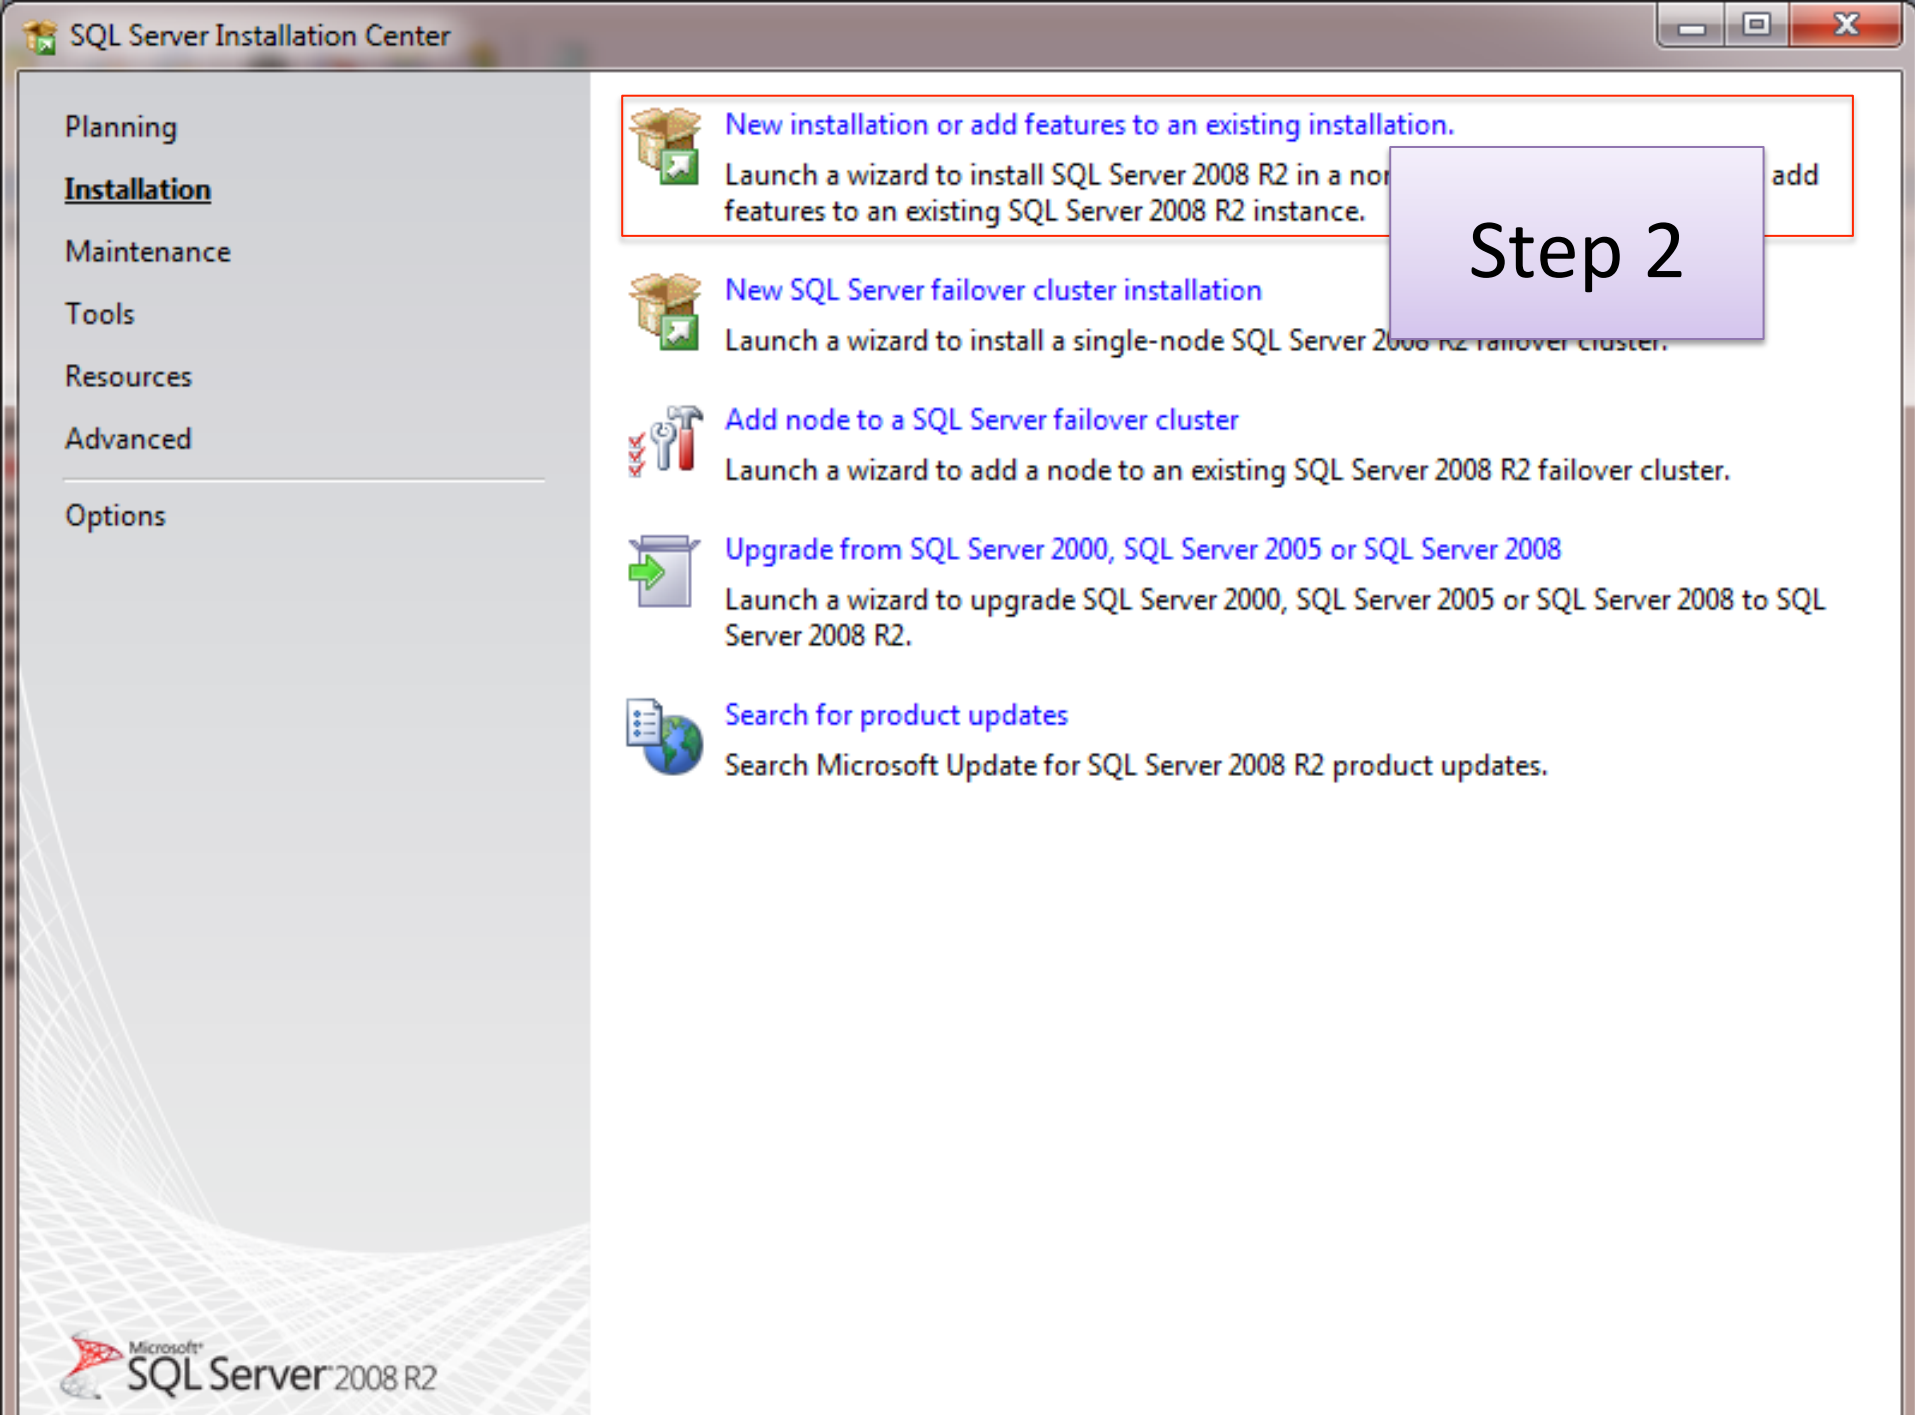

Read instructions on how to get started with SQL Server 2008 R2 failover clustering.

[How to Get Started with a PowerPivot for SharePoint Standalone Server Installation](#)

Read instructions on how to install PowerPivot for SharePoint in the fewest possible

Step 1

Planning

Installation

Maintenance

Tools

Resources

Advanced

Options

[New installation or add features to an existing installation.](#)

Launch a wizard to install SQL Server 2008 R2 in a new instance or add features to an existing SQL Server 2008 R2 instance.

add

Step 2

[New SQL Server failover cluster installation](#)

Launch a wizard to install a single-node SQL Server 2008 R2 failover cluster.

[Add node to a SQL Server failover cluster](#)

Launch a wizard to add a node to an existing SQL Server 2008 R2 failover cluster.

[Upgrade from SQL Server 2000, SQL Server 2005 or SQL Server 2008](#)

Launch a wizard to upgrade SQL Server 2000, SQL Server 2005 or SQL Server 2008 to SQL Server 2008 R2.

[Search for product updates](#)

Search Microsoft Update for SQL Server 2008 R2 product updates.

Setup Support Files

Click Install to install Setup Support files. To install or update SQL Server 2008 R2, these files are required.

Step 3

Setup Support Files

The following components are required for SQL Server Setup:

Feature Name	Status
Setup Support Files	

Setup Support Rules

Setup Support Rules identify problems that might occur when you install SQL Server Setup support files. Problems are identified and corrected before Setup can continue.

Step 4

Setup Support Rules

- Product Key
- License Terms
- Setup Role
- Feature Selection
- Installation Rules
- Disk Space Requirements
- Error Reporting
- Installation Configuration Rules
- Ready to Install
- Installation Progress
- Complete

Operation completed. Passed: 10. Failed 0. Warning 1. Skipped 0

Installation Progress

Complete

☒ SQL Server Feature Installation

Install SQL Server Database Engine Services, Analysis Services, Reporting Services, Integration Services, and other features.

☐ SQL Server PowerPivot for SharePoint

Install PowerPivot for SharePoint on a new or existing SharePoint 2010 server to support PowerPivot data access in the farm. To use the New Server option, SharePoint must be installed but not configured.

Add PowerPivot for SharePoint to:

New Server

☐ All Features With Defaults

Install all features using default values for the service accounts.

Help

Feature Selection

Select the Enterprise features to install.

Step 6

- Setup Support Rules
- Product Key
- License Terms
- Setup Role
- Feature Selection**
- Installation Rules
- Instance Configuration
- Disk Space Requirements
- Server Configuration
- Database Engine Configuration
- Analysis Services Configuration
- Reporting Services Configuration
- Error Reporting
- Installation Configuration Rules
- Ready to Install
- Installation Progress
- Complete

Features:

- Instance Features
- ☒ Database Engine Services
 - ☒ SQL Server Replication
 - ☒ Full-Text Search
 - ☒ Analysis Services
 - ☒ Reporting Services
- Shared Features
- ☒ Business Intelligence Development Studio
 - ☒ Client Tools Connectivity
 - ☒ Integration Services
 - ☒ Client Tools Backwards Compatibility
 - ☒ Client Tools SDK
 - ☒ SQL Server Books Online
 - ☒ Management Tools - Basic
 - ☒ Management Tools - Complete
 - ☒ SQL Client Connectivity SDK

Server features are instance-aware and have their own registry hives. They support multiple instances on a computer.

Select All Unselect All

Shared feature directory: C:\Program Files\Microsoft SQL Server\ ...

Shared feature directory (x86): C:\Program Files (x86)\Microsoft SQL Server\ ...

Instance Configuration

Specify the name and instance ID for the instance of SQL Server. Instance ID becomes part of the installation path.

Installation Progress

Complete

☒ Install the native mode default configuration.

Setup will install the report server and configure it in Native mode to use the default values. The report server is usable as soon as Setup is finished.

☐ Install the SharePoint integrated mode default configuration.

Setup will create the report server database in SharePoint integrated mode and configure the report server to use the default values. However, integrated operations will not be supported until a minimal installation of a SharePoint product or technology is deployed on the report server computer and the Reporting Services Add-in for SharePoint Technologies is installed and configured on the instance of the SharePoint product or technology you are using.

☐ Install, but do not configure the report server.

Setup will install, but will not configure, the report server software. After installation is finished, you can use the Reporting Services Configuration tool to set options that are required to run the report server.
